

Realization of standardized connection

DeviceXPlorer OPC Server

DxpSERVER Series
Ver.6

TAKEBISHI
PRODUCT
CHECK!

What is OPC

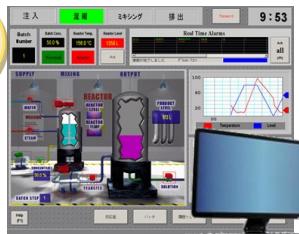

Interface standard for software-to-software communication

Using OPC enables system development independent of production equipment.

There are many software packages that support OPC all over the world.

Use in combination makes it easier to reduce development man-hours and divert assets.

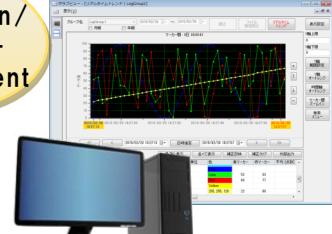

ERP/MES
SCADA
DCS

Analysis

Production/
Quality-management

OPC Client

Instruct data acquisition/writing to OPC Server, and monitor and control equipment.

OPC

OPC

OPC

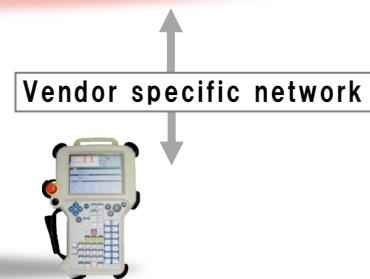

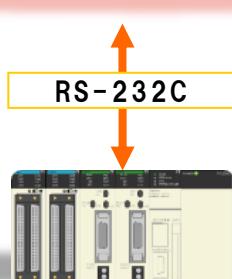

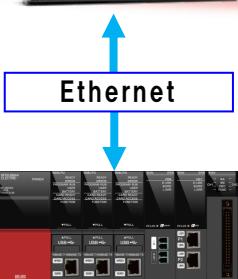

OPC Server

Communication with the control equipment, and data acquisition/writing of production information.

Dxp SERVER

DeviceXPlorer
OPC Server

Ethernet

RS-232C

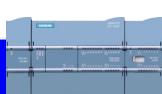

Vendor specific network

Ideal for multi-vendor systems

Standardize equipment with mixed vendors and models

OPC can absorb vendor-specific communication specifications and standardize host systems.

OPC Server can communicate with controllers through various networks such as Ethernet and Serial, And protocols such as CC-Link IE, Ethernet/IP.

Vendor-specific communication specifications
Physical interfaces (Serial・Ethernet)

What is OPC UA

International standard “IEC62541” in the industrial field

Features

1. Platform independent

Previous OPC Classic was only applicable to Windows-based systems, it enables to develop applications for various platforms. The application area has been expanding from embedded to tablet and mainframe.

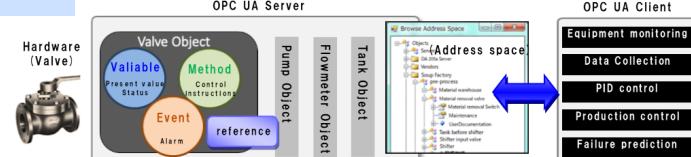

2. Information model works

*DeviceXplorer OPC Server plans to support in the future.

Information model is a definition of information exchanged between applications. By using an information model, complex information can be accurately exchanged between applications. It is possible to share and achieve interoperability beyond the boundaries of each vendor.

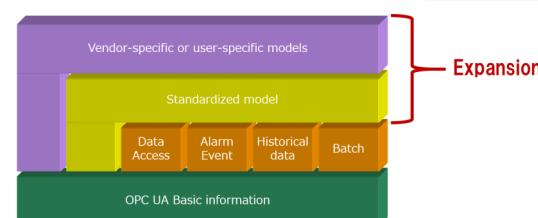

Information is expressed in object-oriented

Even complex multilayer structures can be defined as modeled information.

Information definition can be expanded

Activities are underway to capitalize the standard models of each industry and industrial field as OPC UA information models. Collaboration with other standardization organizations in progress, such as PLCopen and umati.

3. High security communication

OPC UA can flexibly respond to security requirements that varies in various area as a highly reliable industrial communication standard. Enables select an authentication/encryption method to protect important data from eavesdropping and spoofing threats.

◆ Countermeasures against threats

Threat	Measures built into OPC UA
Wiretapping Message fabrication, impersonation Message falsification Message resend Invalid message :	Encryption Signature Authentication Signature data verification Sequence number verification Parameter validation :

Communication software for device data DeviceXPlorer OPC Server

Point 1

230 compatible devices

Increasing connectable models

DxpSERVER supports connectivity to Machine tools and EtherNet/IP devices in addition to conventional connectivity such as PLCs, robots, and Barcode readers. Also it works as OPC UA Client and enable to data sharing with other OPC UA server.

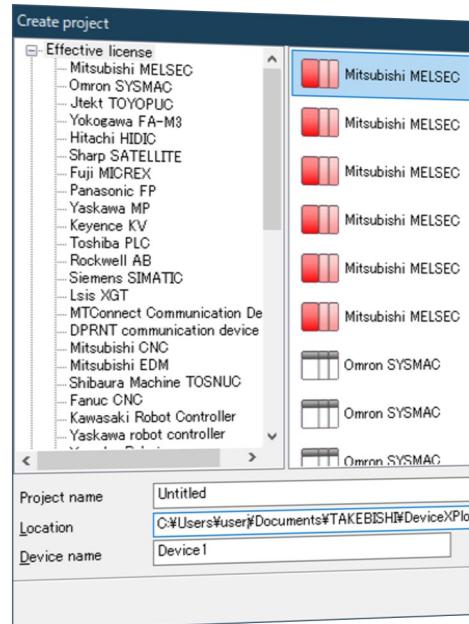

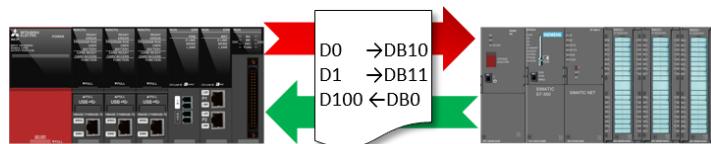

Point 2

Rich function

Value bridging & script

Data can be exchanged between devices from different vendors. Logic including four arithmetic operations with fixed period/event execution is also possible.

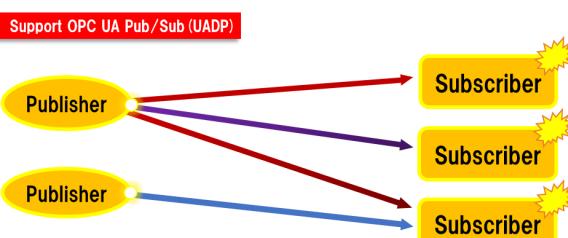

Point 3

OPC UA Pub/Sub compatible

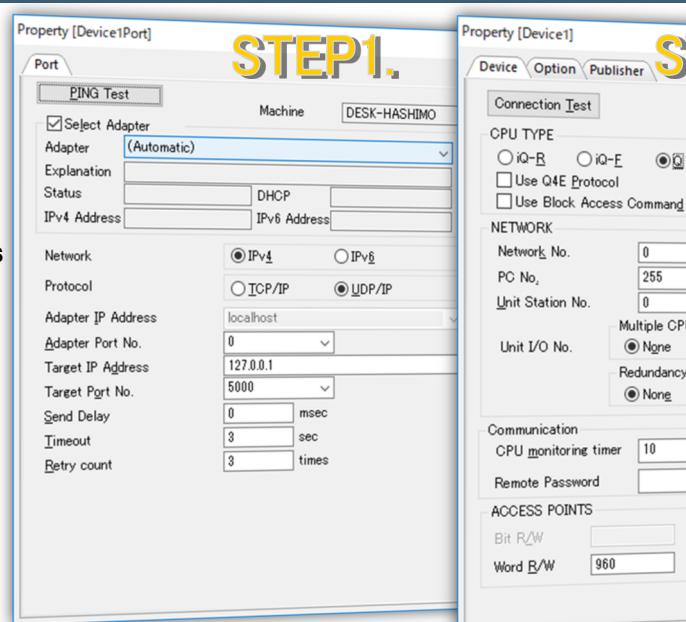

OPC UA 1.04 specification compliant

Compared to the conventional server / client configuration, communication load can be reduced and time lag can be prevented when connecting N: N.

*Publisher: Multicast transmission of data collected from devices
*Subscriber: Receives messages sent by publishers

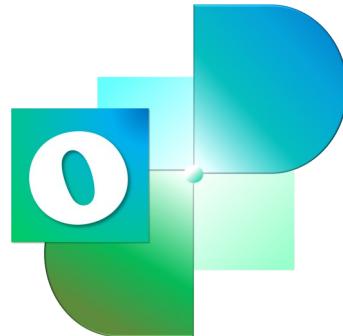

3 Step / Easy Setting

Multilingual display

- Enable to dynamic change of a display language, such as Japanese, English, Chinese (Traditional and Simplified) and Korean.
- Ideal for overseas system project

- ① Communication method (Port Setting)
 ② Model selection (Device Setting)
 ③ Acquisition data address (Tag Setting)

STEP2.

STEP3.

Compatible with old products

- Old Project files are compatible with Ver.6.
 * Ver.3 settings are convertible for Ver.6 with a dedicated tool.

Ver.4 Project file (.dpx)

Dxp SERVER

Dxp SERVER

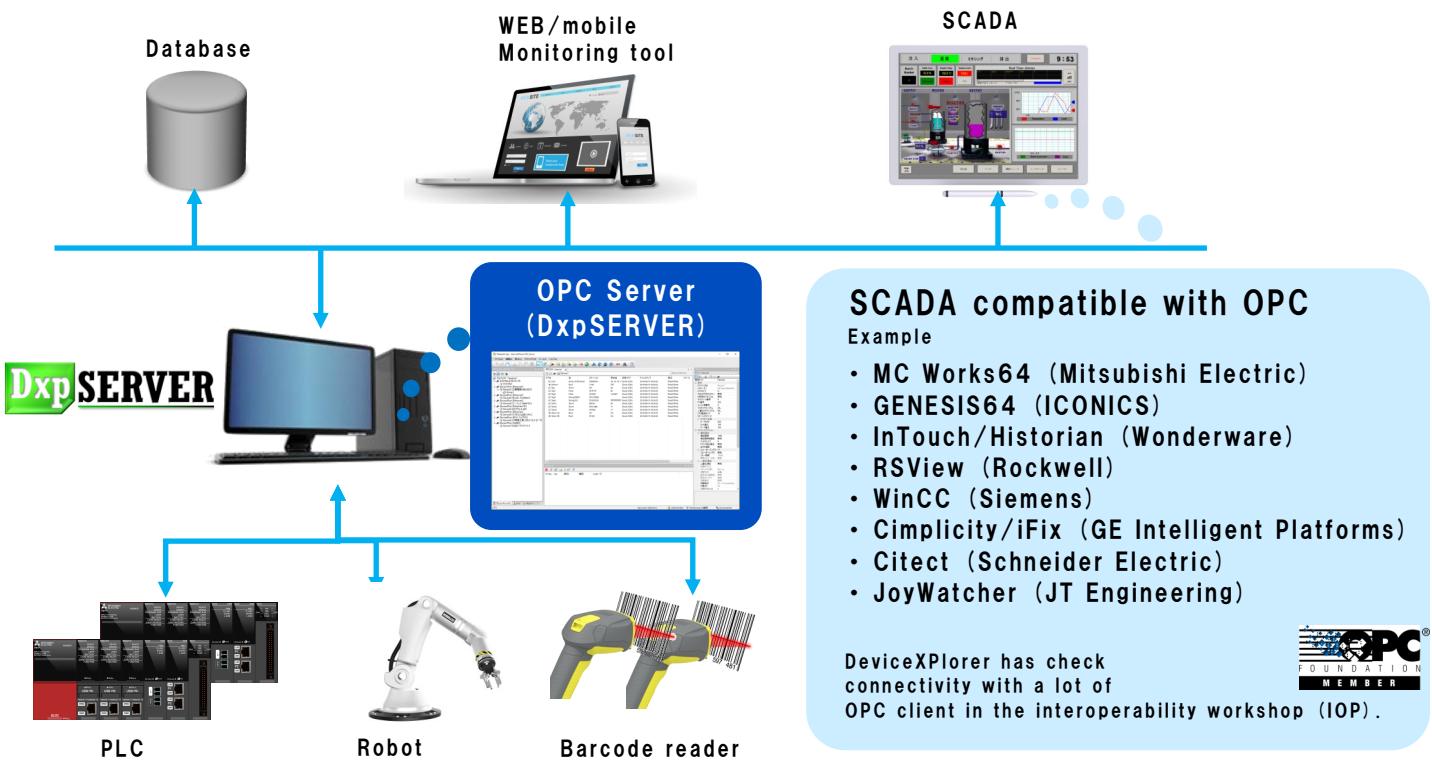

Ver.6 Project file (.dpx)

Ver.5 Project file (.dpx)

Case Study

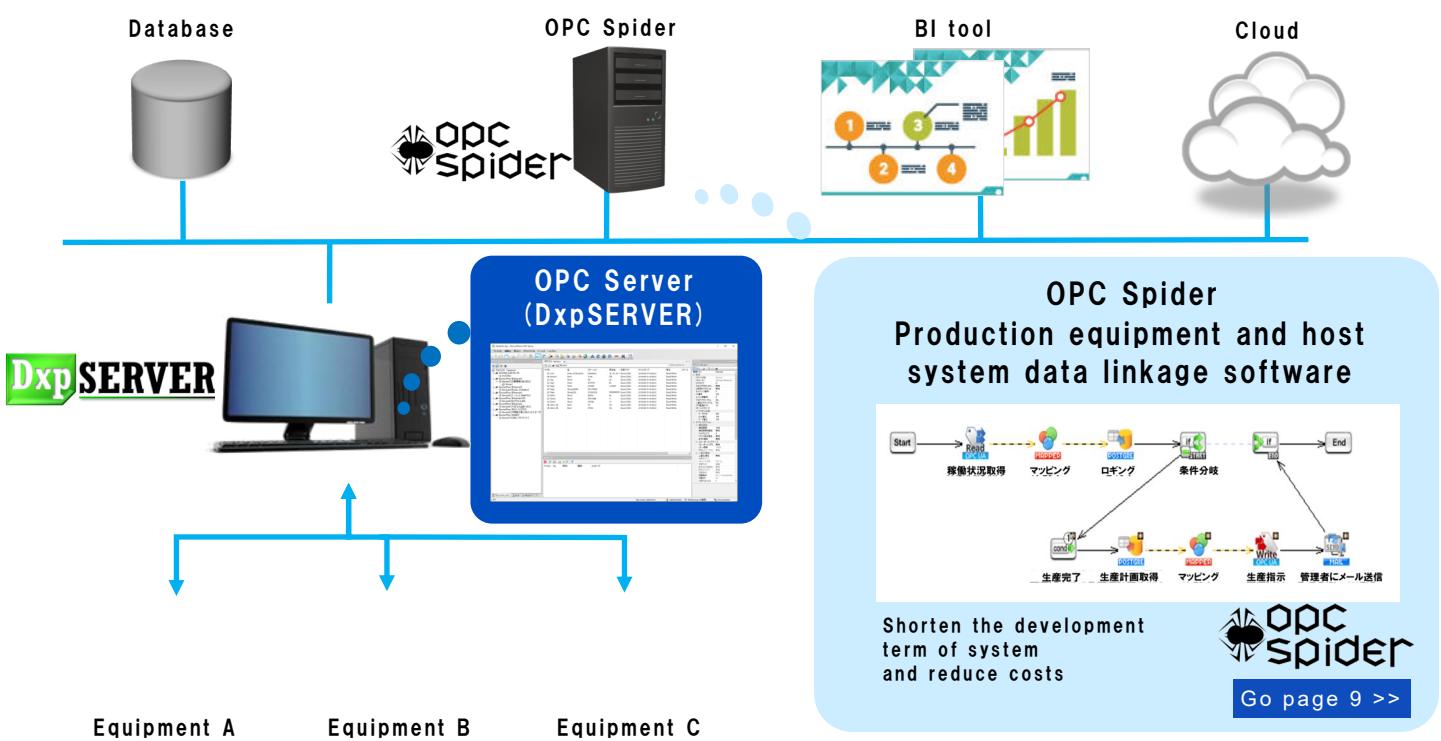

(1) Facility monitoring

- Visualization of equipment in combination with SCADA package and BI tools
- Monitors equipment operating status and alarms through screen displays and E-mail notifications
- The production site can be grasped in real time, and malfunctions are detected immediately

(2) Production management

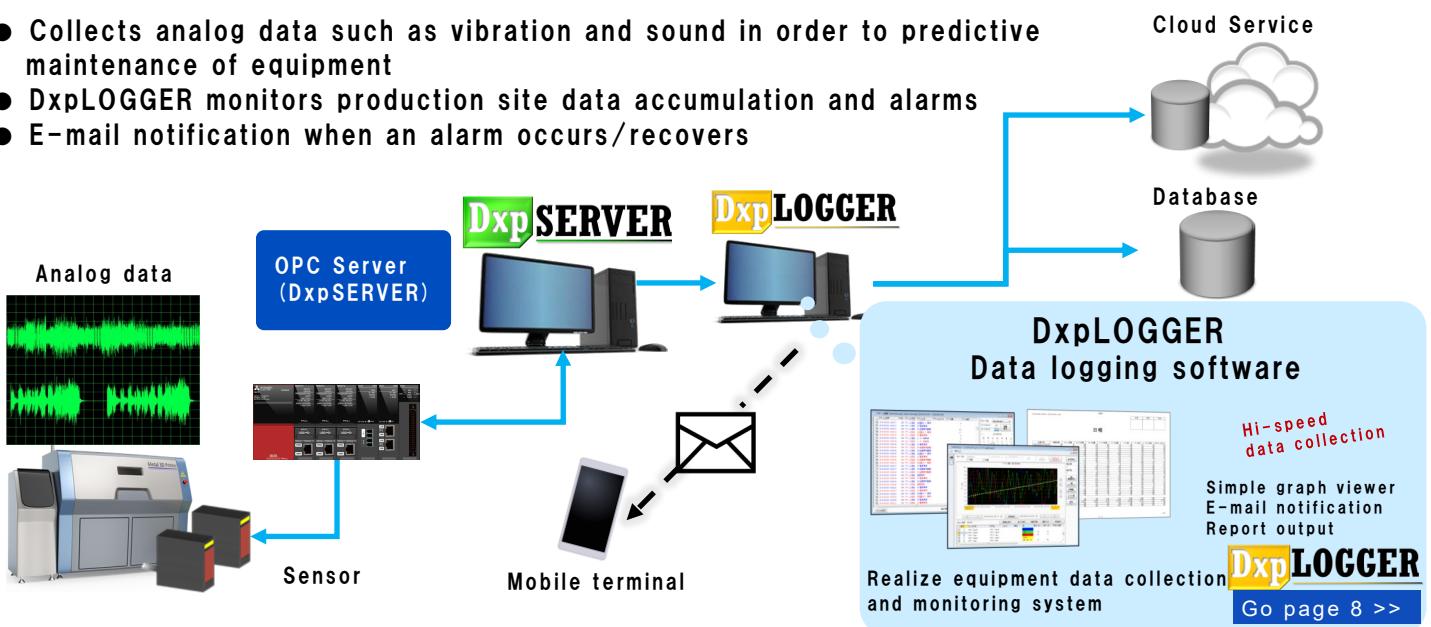

- Production results are collected via the OPC client and automatically stored in the database
- Easy data linkage between different systems in combination with OPC Spider
- Downloads production instructions from MES/ERP to equipment

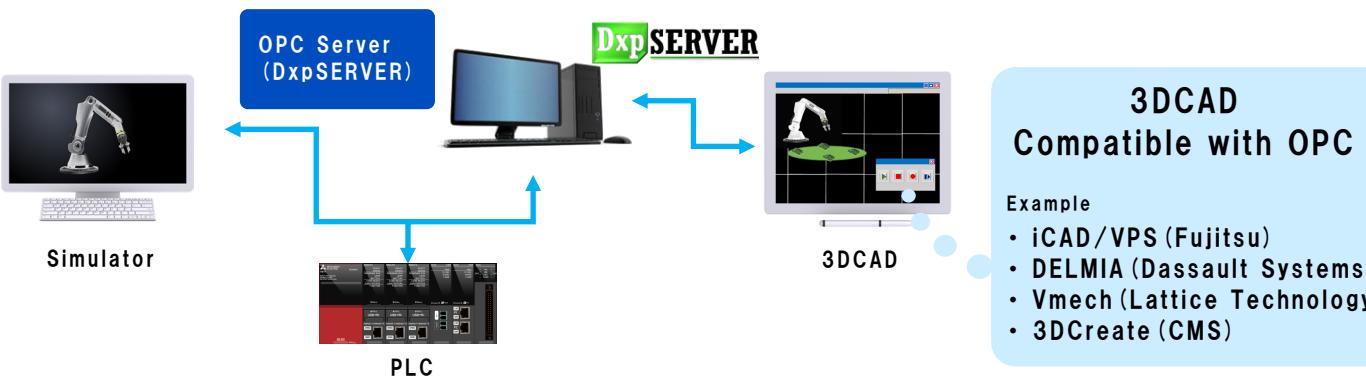

(3) Simple data collection

- Collects analog data such as vibration and sound in order to predictive maintenance of equipment
- DxpLOGGER monitors production site data accumulation and alarms
- E-mail notification when an alarm occurs/recovers

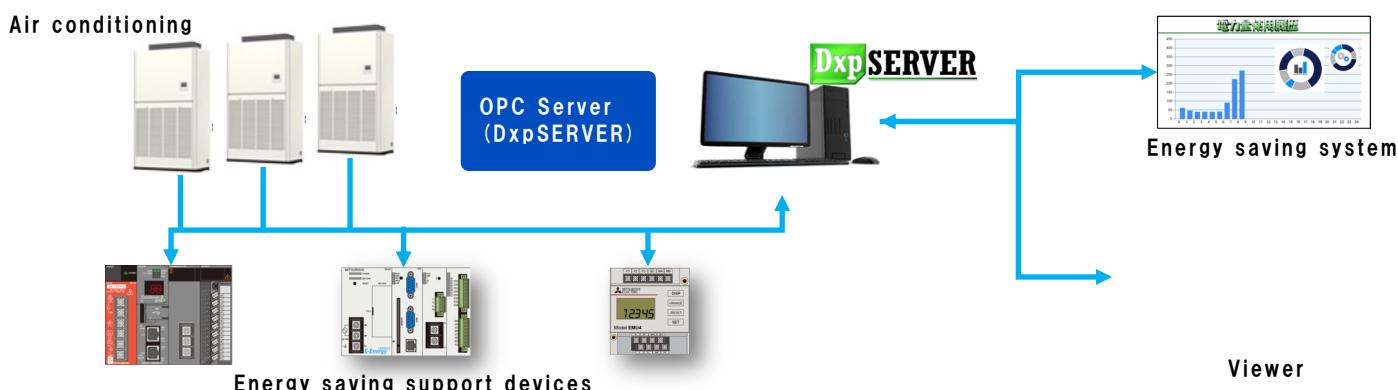

(4) Simulation

- Uses 3DCAD and CAE to realize equipment simulation by virtual engineering
- Prevents unexpected accidents by checking robot arm interference and carrying test
- Shortens start-up time through test automation

(5) Power monitoring and energy saving

- Monitors and controls of power consumption in cooperation with energy saving support system
- Visualizations of energy meter with energy saving support tool and web browsers
- Distributes the air conditioning operating load according to the power usage

➤ Introduction of OPC products

DeviceGateway

OPC Server

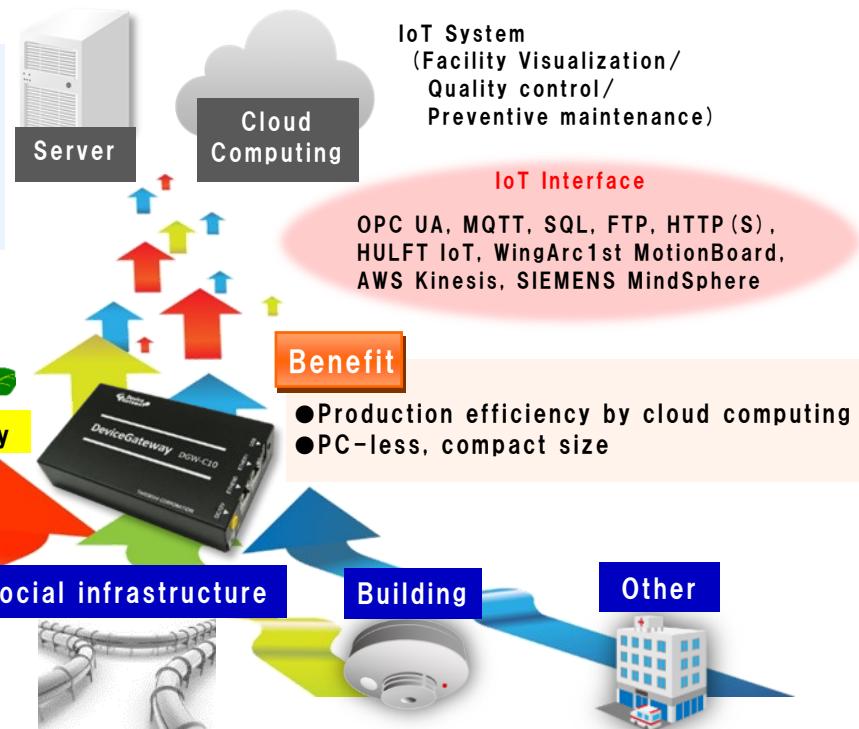

Data Access Unit for IoT

Bridging production site information to host systems and IoT services.

Provides data access to equipment in the factory and facility equipment in the building.

Features

- Operation and setting by browser
- Accessible to 170 devices
- Various IoT Interface
- Data extraction by event detection

Benefit

- Production efficiency by cloud computing
- PC-less, compact size

DeviceXPlorer Data Logger

OPC Client

Industrial data collection software

Logging data to CSV or general-purpose database according to the cyclic or trigger conditions.
Uses an OPC Server, it collects production site information in real time.

Features

- Data collection up to 65,535 points up to
- Simple graph viewer (real-time/historical)
- Automatic output reports automatically
- Alarm notification via E-mail

Benefit

- Easy construction of data logging system
- Reduce development costs and man-hours

Abcd	79,245	6,4
Efghi	89,555	19,5
Jklmn	8,640	7,5

FileArk FA Edition

OPC Server

Text file and host system linkage software

The data accumulated in the legacy equipment bridge to the host system.
Sends data when the text file is updated or request of the host system.

Features

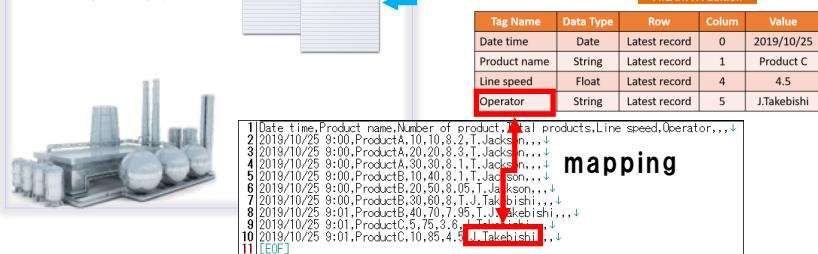

- OPC UA, MQTT conversion of legacy equipment information (File change detection/cyclic)
- Easily link text files with host systems
- Convert text data to real-time data

Legacy equipment

CSV
Text data

FileArk

Operation monitoring

IoT system

Data analysis

OPC Spider

OPC Client

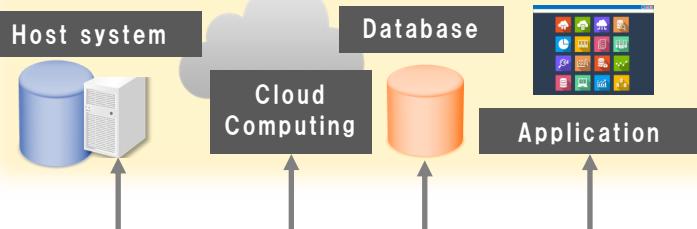

Data linkage software for production equipment and host system

Connects production system and host systems without programming.

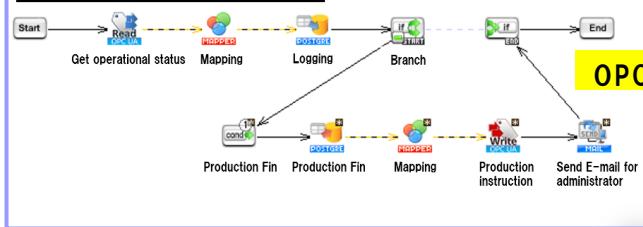

System linkage is possible simply by arranging the componentized icons in order of processing.

Features

- Data linkage without programming
- GUI for easy to understanding of processing flow
- Technical skills for development not required
- Auto creation of specifications

Development screen

Benefit

- Linkage OT system and IT system
- Shorten development term and reduce costs

OPC UA

OT system

- *1 SYSMAC Gateway and CX-Compolet runtime license is required for CX-Compolet connections.
- *2 Required for connections other than Ethernet or serial communication. (Peripheral / USB port communication)
- *3 JTEKT communication library is required in TOYOPUC Built-in CPU Port connection.
- *4 Use "Modbus Connection".
- *5 Use "Modbus Connection" to connect with Panasonic FP series via serial communication.
- *6 Use "EtherNet/IP Connection".
- *7 FANUC "FOCAS1" or "FOCAS2" is required.
- *8 It can access PLC registers as Q4ACPU when using "EZSocket connection"
- *9 Not to access directly when using "EZSocket connection". Access through shared memory of iQ platform (multiple CPU system).
- *10 Please contact us about communication with NCs older than M5.
Also "EZSocketNc Communication" and "DPRNTR Communication" is only available for Enterprise Edition.
- *11 Please contact Shibaura Machine about connectivity.
- *12 Please contact Shibaura Machine about connectivity because T-PX200 does not carry RS-232C interface.
- *13 Use "BACnet Connection".
- *14 A base unit (2500B) is required for 2500 series.
- *15 Use Modbus/TCP Server Connection
- *16 The Japan Steel Works "NET100 Server" is required.
- *17 Contact us if you want to use.
- *18 Support OS for MELSEC interface board connection depends on MELSEC interface board supporting OS.

Specification

Item	Description	
OS	Windows 11(21H2) Windows 10 IoT Enterprise 2019 LTSC, Windows 10 IoT Enterprise 2016 LTSB, Windows 10(1809, 1903, 1909, 2004, 20H2, 21H2) ^{*1} Windows 8.1, Windows 7, Windows Server 2022 / 2019 / 2016 / 2012(R2) / 2008 R2	
Application Type ^{*2}	32bit Application (Win32/x86), 64bit Application (Win64/x64)	
Hard Disk	1GB or more	
Memory	1GB or more	
Framework	.NET Framework 3.5 (32bit application only)	
License	Require a license for each computer to install. (There are no limitation for OPC Client connection)	
Protection	Protected by software key or USB key	
Windows Service Activation	Available	
Maximum PLCs ^{*3}	255	
Maximum Tags	Unlimited	
Support Interface	OPC UA1.04 ^{*4} , OPC DA3.0/2.05A, OPC AE1.10, SuiteLink ^{*5} , DxpLink, Modbus/TCP Server	
Simulation Mode	Available (Random / Increment / Sin / Fixed Value)	
OPC UA Interface	Server Profile	Standard UA Server Profile
	Endpoint URL	opc.tcp://<IP address or Machine name>:52240
	Security Type	None, SignAndEncrypt, Sign
	Security Policy	None, Basic128Rsa15, Basic256, Basic256Sha256, Aes128Sha256RsaOaep, Aes256Sha256RsaPss
	Authentication	Anonymous, User name/password, X509 Certificate
OPC UA Pub/Sub Interface ^{*6}	Transport Profile	http://opcfoundation.org/UA-Profile/Transport/pubsub-udp-uadp
OPC DA Interface	Type	Server/Client
	PROG.ID ^{*7}	Takebishi.Dxp.6
	OPC Access Path	Enable
	OPC Item ID	Use delimiters to specify device, group and tag names.
SuiteLink ^{*5}	Application Name	Any (Default:"DXPV6")
	Topic Name	Any (Default:"Device1")

Attention! Lineup & product type changes from previous products(Ver.4, Ver.5).

Lineup

Providing the product lineup that meets system requirements.
Select from Enterprise / Advanced / Standard Edition.

Edition	Accessible Suite	Script	OPC UA Server Interface	Modbus/TCP Server Interface
Enterprise ^{*8}	All	Unlimited	Supported	Supported
NEW Advanced ^{*9}	One Suite	1 Sec cycle / 1 Script	Supported	N/A
Standard ^{*9+10}	One Suite	1 Sec cycle / 1 Script	N/A	N/A

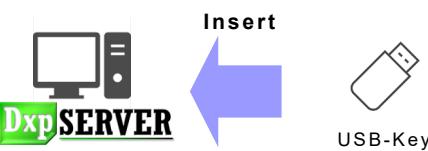

Advanced Edition is that OPC UA server interface added in standard edition.

Product Type

Select package version (software key or hardware key) or download version. ^{*11}

Product Type	Providing	License Activation
Package (Hardware Key)	Send CD-R media and USB key	Attach USB key to PC
Package (Software Key)	Send CD-R media	Required via the Web page
Download	Send download URL via e-mail (No CD-R media)	

License Activation Flow

Product Type	Activation Flow	
Package (Hardware Key)	Insert a Hardware Key and use.	
Package (Software Key) or Download	<p>Perform user registration and get an ID.</p>  <p>the PC with DxpSERVER installed can connect to the Internet Activate using online PC, and use.</p> <p>* Necessary to be performed only during initial installation</p> <p>the PC with DxpSERVER installed cannot connect to the Internet Activate using two PCs (online PC and offline PC), and use.</p>   <p>License Activation Form</p> <p>* Necessary to be performed only during initial installation</p>	

»» See [YouTube "TAKEBISHI FAWEB" channel](#) for detailed license activation procedure.

««

- *1 In Windows10 Home Edition, Windows Update type is fixed "Current Branch"(update is performed automatically), so Pro Edition or above is recommended.
- *2 Following connection types are not available on 64-bit application. Use 32-bit application.
 - MELSEC EZSocket/GOT Connection
 - SYSMAC FinsGateway/SysmacGateway/CX-Compolet Connection
 - TOYOPUC Communication DLL Connection
 - FANUC FOCAS Connection
 - Yaskawa Robot Connection
 - Mitsubishi CNC EZSocketNC Connection
- *3 Communication performance will be down as increasing PLCs. Recommends distributing OPC Server for every 10-20 connections.
- *4 OPC UA interface are available in only Enterprise / Advanced Edition. OPC UA interface doesn't support information model.
- *5 SuiteLink interface is not available on 64-bit application. Use 32-bit application.
- *6 Contact us if you wish to use this service.
- *7 Ver.6 and previous products (Ver.5 and Ver.4) can work on same machine.
- *8 Enterprise edition can be accompanied by 3 or 5 years of software maintenance services.
A free update service is available that allows you to do upgrades including major upgrades as many times as you like during the contract period. Note that you can not change or extend the maintenance period.
- *9 If you purchase the Advanced or Standard Edition, you can select and communicate with one of the following suites after installation.
The model is the same, regardless of the communication suite.

Selectable communication suite:

Suite		
Mitsubishi MELSEC iQ-R/Q/L/FX/QnA/A Series	OMRON SYSMAC-NJ/CJ/CS/CP/CV/C Series * ¹²	JTEKT TOYOPUC-PC10/PC3J/PC2J Series * ¹³
YOKOGAWA FA-M3 Series	HITACHI EH/H Series	SHARP SATELLITE JW Series
FUJI MICREX-SX/F Series	PANASONIC FP-X/FP7/FP2 Series	YASKAWA MP Series (MEMOBUS)
LSIS XGT Series	YASKAWA Robot simulator	KEYENCE KV Series
ROCKWELL AB Logix Series (EtherNet/IP)	SIEMENS SIMATIC-S7 Series	AZBIL (YAMATAKE) CPL protocol
Modbus/TCP,RTU,ASCII client(master)	FANUC PMC Series * ¹⁴	KAWASAKI Robot controller
OPC DA2.05A/3.0 Client function		

*10 Unlike the old products (Ver.5, Ver.4), there is only one model for standard edition, so the model of standard edition does not differ depending on the communication suite.

*11 The product type cannot be changed when version up. Only when new purchase, or upgrade from previous products (Ver.5 or earlier), product type can be selected. Please refer to the model number on P.20 when ordering.

*12 When communicates with SYSMAC, "FinsGateway/SysmacGateway/CX-Compolet" from OMRON may be required depend on communication type.

*13 When communicates with TOYOPUC via CPU built-in serial port, "communication library" from JTEKT is required.

*14 When communicates with FANUC PMC, "FOCAS1/2" from FANUC may be required depend on communication type.

*1 English version or Japanese version are selectable. If you'd like to order Japanese edition, append "-J" instead of "-E" behind the model name.

*2 You can add Free upgrade service for 3 or 5 years to Enterprise Edition only.

- Free upgrade service : You can get free upgrade service as many times as needed, including major version upgrade.

Please note that the maintenance period for the first purchase cannot be changed or extended.

*3 License sheet only provided. If you need installation media itself, please purchase normal license.

*4 Please order version upgrade product(DXPV6■■■-V-E) in the case of upgrading from old major version such as Ver.4 and Ver.5.
